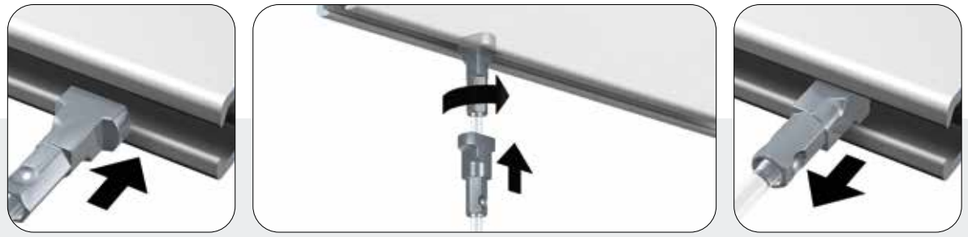
hanging wires and hooks

HANGING WIRES

In addition to the different hanging systems that Artiteq offers, there are (small) essential parts that are needed to actually hang the painting or wall decoration you want on the chosen rail. For example, there are various types of hanging wires and hooks to choose from, depending on your chosen rail and the weight of your painting or wall decoration.

TWISTER™

max **20** kg



1 SIMPLE-SAFE-STRONG

Artiteq developed the Twister glider system for all its hanging rails. Twister offers the most Logical and user-friendly way to hook the hanging wire into the rail: insert, twist, click and you're done. Since the Twister may be clicked anywhere on the rail, you can hang a picture anywhere you like on the wall. You have the option of using Twister in perlon, steel wire or rods for all the Artiteq hanging systems. The perlon and steel hanging wires with the Twister mechanism are available in 1 or 2 mm thicknesses, and in lengths ranging from 100 to 500 cm.

TWISTER™ CLIQ2FIX perlon

max **20** kg

2 EXTRA EASE-OF-USE

Thanks to the development of the Twister Cliq2Fix perlon system, perlon cord now has an additional functionality when it comes to hanging pictures. The hanging wire equipped with the Twister Cliq2Fix system may be inserted in the rail, eliminating the risk of the perlon cord popping loose from the rail as a result of its recoiling effect. This makes it extra safe, and easy to slide into the rail. In other words, extra ease-of-use.

3 SLIDE INTO SIDE

Artiteq developed the Solid Slider system which attaches the hanging wire with glider via the side of the rail. This system is available for 2 mm perlon and 2 mm steel wire. The hanging wire may be freely slid into the hanging rail, yet may not be removed from the rail as easily. Hanging wires with the Solid Slider mechanism are available in lengths of 100, 150, 200, 250, 300 en 500 cm. A slanted stop system is available for slanted walls. This system makes it possible to use a flexible picture hanging system even with slanted walls, for example in a staircase.

HANGING WIRES

1 mm vs 2 mm hanging wires

Artiteq offers the Twister hanging wires in two different thicknesses; 1 mm and 2 mm. Both perlon and steel wire hanging wires are available in the two different thicknesses. The steel wire black hanging wires are only available in 1 mm.

The choice of choosing 1 mm hanging wires depends on one's own requirements. The smaller the diameter of the hanging wire, the less visible it is. Especially with the perlon hanging wires, the choice for 1 mm can be preferable. To hang a frame or wall decoration as invisible as possible.
